

College	Which types of classes (lecture, lecture/lab, lab) do you stack?	If you do stack, do you stack primarily in the arts or in other areas?	Do you limit stacking to the same types of courses (painting example) or do you let different types of courses be stacked?	What union push back have you received?
Allen Hancock	Lab only	Primarily in the arts	Same type of courses	None
Bakersfield	Lab	art studio, automotive, music – piano, choral, band	Same type	None. No extra compensation. It is a way for the program to sustain higher level sections
Barstow	Lab	Fine arts and Physical education	Same type	None
Cerritos	Lecture/lab or lab classes. No lecture courses	Mostly in the fine and performing arts, and PE, but also in business, and some CTE – anything that would have difficulty filling a stand-alone section in which a program/degree/certificate requires an intermediate or advanced component.	Only similar classes in a sequence (for example we would not pair a life drawing class with a freehand drawing class, but might pair 3 levels of life drawing or ceramics)	None. The faculty understand this is to preserve their upper level courses. We do not pay for additional sections that are “stacked” (we call it voided classes at Cerritos) but some colleges do.
Chaffey	Lecture/lab or lab classes	Art, music, dance, drafting	Same type	Some initial, but backed off after other faculty spoke up.
Evergreen Valley	Lecture/Lab	Arts and other areas	Same type	None
Foothill	Mostly lab	Fine arts and computer science		No extra compensation

College	Which types of classes (lecture, lecture/lab, lab) do you stack?	If you do stack, do you stack primarily in the arts or in other areas?	Do you limit stacking to the same types of courses (painting example) or do you let different types of courses be stacked?	What union push back have you received?
Fresno	Lecture, Lecture and lab	Primarily the arts (music, drawing, painting, etc)	No/Yes. For example, we stack (or what we call "cross-list") a child development class with a psychology class (both courses have title of Child Growth & Development). They equate in our registration system.	None. (we have been cross-listing/stacking classes for years...)
Fullerton	Lecture or lecture component of lecture/lab	Arts, science, CTE programs	Same types	None. We do not violate any aspect of contract. For Science classes it results in increased compensation if class size is double or triple the normal size.
Gavilan	Lecture/lab and lab	Arts and music	Same	No union push back
Glendale	Usually lecture/lab	Primarily in the arts but other areas as well...journalism for our college paper for example.	Yes, they are the same topic, but advanced preparations.	None, this has helped program that would otherwise be unsustainable
Grossmont	All	Grossmont is the same as Mesa, but with a few more stacking areas such as: Business technology classes, some ESL and Language classes, etc. It is very prevalent in many disciplines. We also use double lectures for science classes that may qualify instructor for contractual	Same discipline	None to day

		large class bonuses.		
<b>College</b>	<b>Which types of classes (lecture, lecture/lab, lab) do you stack?</b>	<b>If you do stack, do you stack primarily in the arts or in other areas?</b>	<b>Do you limit stacking to the same types of courses (painting example) or do you let different types of courses be stacked?</b>	<b>What union push back have you received?</b>
Imperial Valley	All	Arts	Limited to the same types of courses	None
Lake Tahoe	Lecture/Lab	Visual & Performing Arts, and other areas	Same type	None
Merced	Lecture and lecture/lab	Arts and lecture for sciences	Same type	Not yet. Science lectures are in contract as "large class" size, so faculty are compensated for the large lecture. Nothing in contract about the ARTS.
Mt. San Antonio	Mostly lecture classes, but some lecture/lab.	We have had historically a practice of stacking higher level foreign language courses (SPAN 5 & 6, for example). This practice will not continue after this semester in foreign languages.	We stack courses in the same family only.	None that I know of. We had a faculty concern that it was not appropriate to assign adjunct faculty to teach stacked courses, especially those with 3 levels because the preparation was intensive and perhaps not fair to the adjunct faculty, so I think the stacking has been mostly limited to FT faculty, although I know we had stacked courses in German (Levels 2 and 3) and only adjunct faculty in that discipline.

College	Which types of classes (lecture, lecture/lab, lab) do you stack?	If you do stack, do you stack primarily in the arts or in other areas?	Do you limit stacking to the same types of courses (painting example) or do you let different types of courses be stacked?	What union push back have you received?
Mesa	All	Arts, computer studies, physical education, music	Same discipline	None to day
Mira Costa	Lecture/lab and lab	Arts and music	Same	No union push back
Monterey Peninsula	Lab	Typically in PE, Creative Arts, Music	Same	No
Ohlone	Mostly lab but a few lecture/lab	Most in arts but also in Computer Networking and some in Computer Applications	Various types	None
Palomar	Lab	Arts, Performing Arts, Business/Computer/Graphics labs, PE, other disciplines where intermediate, advanced course sections would have difficulty meeting minimum enrollments.	Same types of courses with different levels of skill development	None. Faculty know that offering "stacked" classes is the only way to really sustain some of their programs so students can complete certificate/degree requirements.
Rio Hondo	Lecture	Mostly arts, some other areas, such as speech	Same type	None. Faculty receive additional compensation
San Bernardino Valley	Lecture/Lab, Lecture	Arts and other area	Same type	None
San Jose	Lecture/lab	Arts, World Languages, CTE Programs	Same type	None
Santa Rosa	All	Arts and Computing studies	Same family	None
Santiago Canyon	Yes	Primarily art and music	Limited to the same types of courses	No union push back
Siskiyou	Lecture/Lab	Visual & Performing Arts, Welding & other CTE courses, photography, music, art, occasional advanced Spanish	Same type	None

College	Which types of classes (lecture, lecture/lab, lab) do you stack?	If you do stack, do you stack primarily in the arts or in other areas?	Do you limit stacking to the same types of courses (painting example) or do you let different types of courses be stacked?	What union push back have you received?
Solano	All, as needed	Any area that may need it so that the courses can be offered to students.	Same discipline, usually different levels (Spanish 2/3, Welding 1/2, etc.).	None
Taft	Lecture/Lab	Mostly arts but some other areas too depending on	Same type	None
Ventura	Lecture and lecture/lab	Primarily in Music, Art, a few in Theatre Arts, Internships in our Construction Technology program and Auto, plus 1 ESL class	Same as #2	No union push back. We only take into consideration one class for purposes of load.
Victorville		Biology, French, Art, Music and PE	In the Arts we may stack courses such as Art 101 & Art 102; In Biology which is lecture and lab, stack the lecture, for example...lab/lecture (for two sections)/lab.	No union push back, that I am aware of.
